Address _____

Number of packages _____

Type of Queen:

Italian _____

Carnioles _____

Amount Enclosed: _____

These are 5# packages from the Mountains of Oregon. Away from pesticides and herbicides. These Bees have not been fumigated with anything.

They come from a like climate of Anchorage in the spring. The travel time is one day on Alaska Airlines. This helps with the stress of flight and reduces the mortality rate.

There are more bees so you may feed more but it will get them thru the cool nights and reduce cool effects, which led to the Queens not laying as much.

I had very good luck with them last year. They were good size fat, dossal and easy to handle.
